

## **Where are the exam questions?**

**Folder G – “Past Courses at CU”.** PDF versions of full exams can be found in the individual course folders in the archive. In contrast to the homework problems (Folder E, organized by topic), exams are organized by course and given in their entirety. One reason for this is the nature of timed exams – we have no reliable estimates for how long students may spend answering individual questions, but we know that most students can complete each of the exams in 1-1/2 hours (2-1/2 hours for finals). Also, the exams were crafted while keeping in mind the level of difficulty, timing, emphasis, and many other factors specific to that particular course, and the questions should be seen in that context. Solutions for the exams can be found in Folder I – “Solutions”. [Password-protected, contact us if you want access to these.]
