PHYS3220

Name (and, what do you prefer to be called?):

Major:

What physics courses have you taken previously at CU?

What math courses have you taken previously at CU?

What physics and/or math courses are you currently taking, besides this one?

In what course(s), have you studied complex numbers? (If you can't remember, just guess. If you have never studied complex numbers, just say NONE.)

In what course(s), have you studied matrix math/linear algebra?

In what course(s), have you studied partial differential equations?

The prereqs for this course are:
Phys2210, PHYS3210 and either PHYS2130 OR PHYS2170.
Have you met the prereqs? If not, which are you missing?

Briefly, (if you want to share!) what are your short-term and/or long-term career goals? (Grad school/PostDoc/Faculty? Industry/management/wealth? Peace Corps? K-12 teacher? Ski bum?)

Anything we should know about you?
